Haystax Customer Successes

A 20-year history of security risk innovation

Our mission

At Haystax, our mission is to proactively mitigate security risks, using pioneering artificial intelligence techniques and a user-friendly software platform to enable decision-makers to respond rapidly and with confidence.

Haystax is a leading security analytics platform provider, delivering advanced risk-mitigation solutions that enable rapid understanding and response to virtually any type of cyber or physical threat. Based on a patented model-driven approach that applies multiple artificial intelligence techniques, Haystax solutions reason like a team of expert analysts to detect complex threats and prioritize risks in real time at scale. All our products are designed to be predictive and transparent, and to enhance existing analyst and decision-maker workflows. That's why top federal government agencies and large commercial enterprises, as well as state and local public-safety organizations, rely on Haystax for more effective protection of their critical systems, data, facilities and people.

Haystax is wholly owned by Fishtech Group, a leading provider of cloud-focused, data-driven cybersecurity solutions. Fishtech is based in Kansas City, Missouri.

The Haystax Analytics Platform flexes to a wide array of solutions to meet evolving security challenges. By using Haystax, organizations can move to a more dynamic and predictive risk posture, making better-informed decisions and streamlining response times.

Our products include:

- *Haystax for Insider Threat*: The only solution that establishes and continuously evaluates a 'whole-person' model of trustworthiness to pinpoint insider threats early and accurately.
- *Haystax for Public Safety*: Enables users to detect, monitor, analyze, communicate and respond to emerging threats and ongoing incidents from a single incident management system – for use by corporate security teams, as well as law enforcement and public safety agencies.
