Haystax Technology

A 20-Year History of Redefining Risk Analytics

About our company

Haystax Technology is a leading security analytics platform provider, delivering advanced security analytics and risk-management solutions that enable rapid understanding and response to virtually any type of cyber or physical threat. Based on a patented model-driven approach that applies multiple artificial intelligence techniques, Haystax Technology solutions reason like a team of expert analysts to detect complex threats and prioritize risks in real time at scale. All our products are designed to be predictive and transparent, and to enhance existing analyst and decision-maker workflows. That's why top federal government agencies and large commercial enterprises, as well as state and local public-safety organizations, rely on Haystax for more effective protection of their critical systems, data, facilities and people.

About Constellation

Haystax Technology's Constellation Analytics Platform™ flexes to a wide array of solutions to meet evolving security challenges. By using Constellation, organizations can move to a dynamic and predictive risk posture, make better-informed decisions and accelerate response times.

Haystax products built on the Constellation platform include:

- *Constellation for Insider Threat*: The only solution that establishes and continuously evaluates a 'whole person' model of trustworthiness to pinpoint insider threats early and accurately.
- *Constellation for Incident Management*: Detects, monitors, analyzes, communicates and responds to emerging threats and ongoing incidents from a single incident management system – for use by defense, corporate security, law enforcement or public safety agencies.
